## Advantages of UPVC Windows & Doors

**Thermal Insulation and Energy Efficient:** UPVC window and door has a low thermal conductive, which can reduce the loss of energy. They are designed with multi-chambers which also reduce the transmission of heat.

**Sound Insulation:** The multi-chambers, welded corners and tight seals offer excellent sound insulation.

**Water Tightness:** UPVC windows and doors absorbs water below 0.1%. Moreover the uniquely designed weep hole and weather strip in the meeting rail provide water resistance proof.

**Weather Resistance:** UPVC windows and doors are exposed in scorching sun, storms, dryness, high humidity or other extreme weather change. They do not rot, corrode nor warp. Even after many years, the windows and doors are still attractive, perfectly tight and working well.

**Environmental Friendly:** UPVC windows and doors can be fully recycled.

**Corrosion Resistance:** UPVC windows and doors is free from the attack of acids, alkalis, waster gases and salts.

**Fire Resistance:** UPVC material used in windows and doors are difficult to ignite and do not support or enhance accidental fires unlike their timber counterparts.

**Strength and Security:** ALL main UPVC profiles are reinforced with steel, providing a high level of security.

**Maintenance Free:** The closed smooth surface of UPVC ensures ease of clean by using gentle household detergent dissolved in water. They are also available with a foil coating in different colours, so you do not need to paint it.

**Electricity insulation:** UPVC windows and doors have high electricity insulation.
